

Autism Spectrum Intervention Specialist Certificate (ASISC) Requirements

Certificate Coursework and capstone projects are prescribed based on the program approved for KSU. The ASISC Program is a joint offering through Speech Pathology and Special Education. It is not an Ohio Department of Education program. Students must apply and be admitted into the ASD certificate program to be eligible for the KSU certificate. The courses prescribed on this page apply toward the ASD certificate. If you are interested in a master's or doctorate degree from KSU, you must be fully admitted into that program and complete the prescribed coursework on the prospectus for that program in addition to the courses that are prescribed for the ASD certificate.

Course #	Course Name	Required or Alternate Course	Credit
